Coating Technology

涂布技术

Adopting a solvent-free, thermally cured silicone system for sustainability, we achieve precise coating weights between 0.3 and 3 gsm through a high-precision six-roll transfer process.

采用绿色环保的无溶剂热固化硅油体系，并通过六辊转移涂布技术，将硅油涂布量精准控制在 0.3-3 gsm 之间，确保品质均一。

In partnership with silicone coating suppliers, we co-develop tailored formulations, offering single side siliconized (C1S) and double side siliconized (C2S) solutions that deliver consistent performance across a full range of release levels.

与硅油原料伙伴共同研发多种配方，提供单面 (C1S) 和双面 (C2S) 涂硅方案，灵活覆盖不同离型力区间，稳定满足多种应用需求。
